PcVue SIMPLIFIES INDUSTRIAL DIGITAL TRANSFORMATION

The PcVue platform is your go-to, cyber-secure digital solution for effortlessly monitoring and controlling your diverse range of connected systems and devices using the latest software development technologies. It provides a set of features “ready to configure” to allow the system designer to create a personalized end-user application. PcVue platform’s extensive connectivity capabilities allow it to collect large amounts of raw data, process it and distill it into relevant, usable information for optimized decision-making. Finally, through its intuitive and powerful user interface, PcVue facilitates the operator’s daily activities and reduces the users’ training time, making onboarding and operations more efficient.

PcVue SOFTWARE SCADA PLATFORM

AT A GLANCE

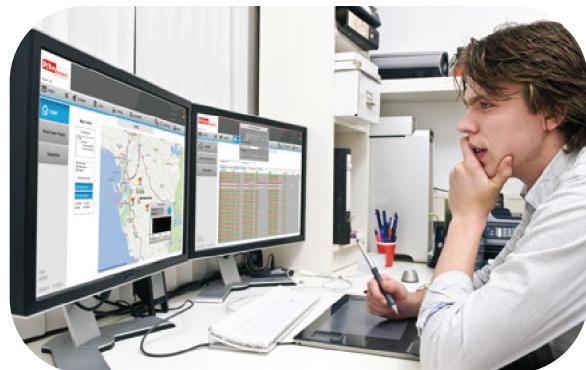

OUR PRODUCTS

Embedding cutting-edge technologies & features

PcVue - HMI/SCADA

Secure, stable, scalable software platform designed for monitoring and controlling any connected systems and devices.

WebVue - Web HMI

Built-in HTML5 web client providing a user interface to monitor and control your process from any device.

TouchVue - Notifications mobile app

A mobile app to notify mobile users for immediate action.

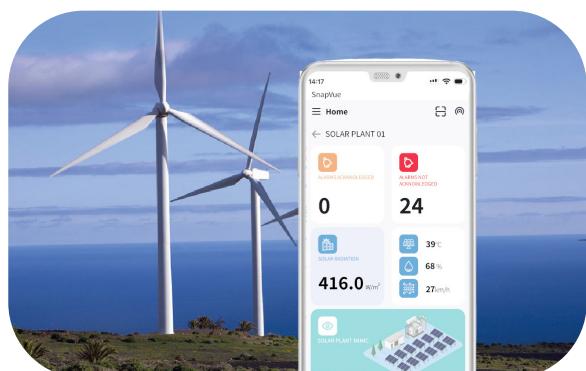

EmVue - Energy monitoring

Full-featured solution to monitor and analyze energy data.

SnapVue - Digital mobile assistant

Situation-based mobile solution with geolocation, chatbot, widget and messaging to help field workers in their operations.

FrontVue - Light HMI

Graphical user interface OPC client that retrieves real-time data from one or more OPC servers for monitoring and control any system.

PARTNER PLATFORMS

Alert - Alarms management

Software platform for real-time alarms reporting, notifications and escalation.

Dream Report - Advanced reporting

Programming free solutions for industrial reports, analytics and dashboards.

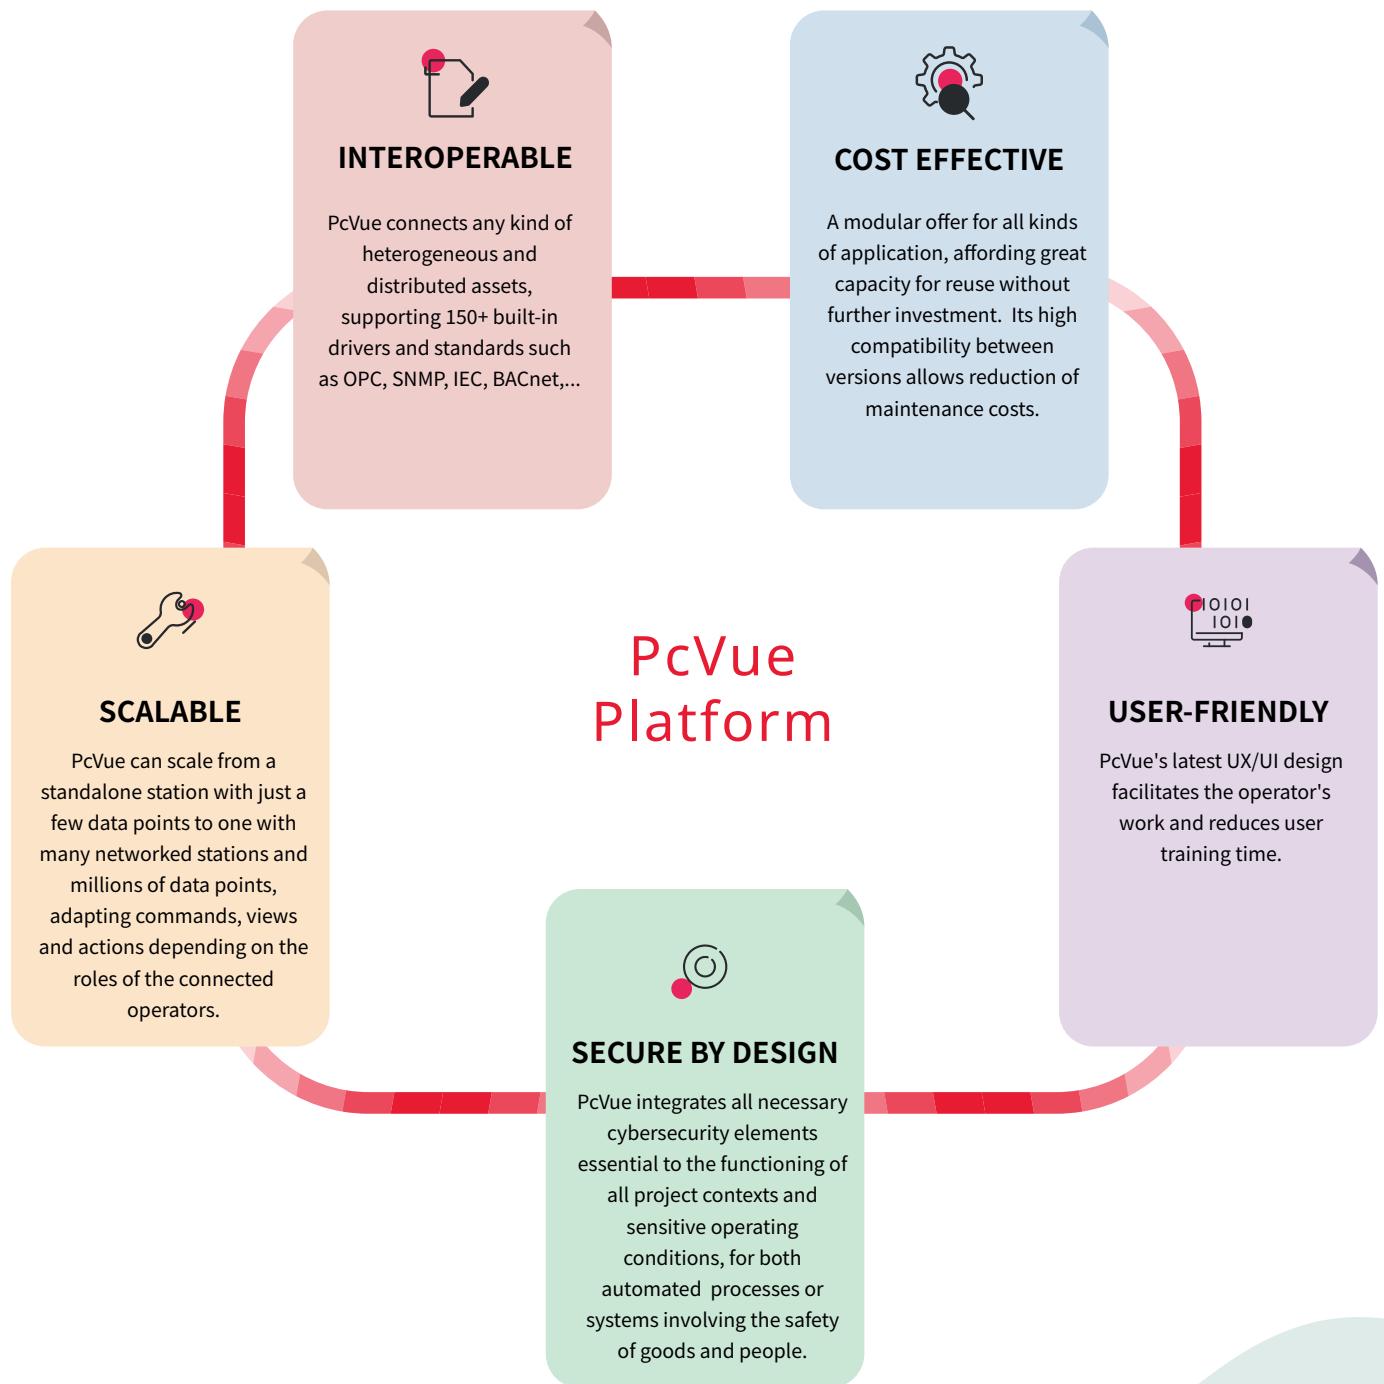

Canary - Historian

Industrial data platform designed to help you collect, store, and analyze all your organization's process data.

Pcvue ACADEMY

Digitize your training!

PcVue offers an online Learning Platform for anyone interested in learning how to master our PcVue platform!

With tailored training courses that adapt to your progress and needs, and a catalogue of trainings for all levels and areas of activity, PcVue Academy provides significant advantages.

 <p>Smart Bots</p> <p>Subscribed</p> <p>Trainers AT, AC, NK</p> <p>Categories Mobility</p>	 <p>IEC 60870-5 104 & 101</p> <p>Subscribed</p> <p>Trainers AC, FB, GC</p> <p>Categories Data acquisition</p>	 <p>Video Monitoring</p> <p>Subscribed</p> <p>Trainers AC, WO, NK</p> <p>Categories HMI design</p>	 <p>Application Architect - Basics</p> <p>Subscribed</p> <p>Trainers FB, AC, HG</p> <p>Categories Basics</p>

At PcVue, we make sure that our customers are able to take full advantage of our platform. Our training team is available to answer your questions and help you during the entire life-cycle of your projects

SMART BUILDINGS

Office buildings, data centers, industrial facilities, hospitals, airports, train stations, parking lots, malls, universities

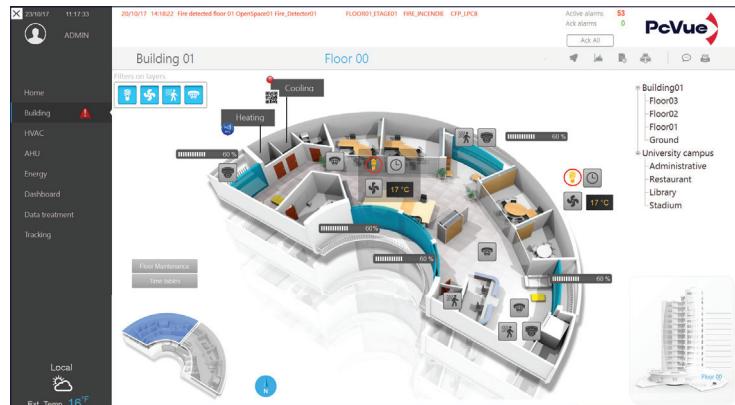

Download brochure

Supervision is the extension of buildings increasingly connected, interactive, intuitive... and smarter!

- ✓ Manage one or several buildings in a centralized and cohesive manner
- ✓ Ensure occupants' comfort and safety in all circumstances
- ✓ Guarantee proper functioning and durability through efficient maintenance
- ✓ Optimize the return on investment while ensuring regulatory compliance defined through a web interface

- ✓ Run an open and scalable system that adapts to changes at lower cost
- ✓ Interoperability with all building management services
- ✓ Optimized management of alarms and events
- ✓ Hundreds built-in drivers and connectors for full interoperability

THEY TRUST US

Hundreds of smart building projects are running worldwide using our solutions. Ask your sales representative to know more.

DATA CENTERS

- ✓ Manage one or more computer rooms or data centers, in a centralized and consistent manner
- ✓ Ensure the activity and security of systems in all circumstances
- ✓ Contribute to the proper functioning and sustainability of installations through effective maintenance
- ✓ Optimize investments while ensuring compliance with regulations
- ✓ Have an open and scalable system that adapts to changes and objectives, at a lower cost
- ✓ Connect all building and IT components (Technical management, networks, CMMS, CMDB, Safety, Security, etc.)

A common platform for centralized monitoring layer and supervision layer of data center or computer room systems

- ✓ Intuitive graphic interface for monitoring and controlling installations, locally or remotely
- ✓ Real-time energy monitoring and analysis
- ✓ Optimized management of alarms and events
- ✓ Our platform integrates easily into your site's compliance framework - from Tier 1 to Tier 4 - and operates smoothly within environments aligned with ISO 27001, ISO 14001, and ISO 50001 standards

THEY TRUST US

Hundreds of datacenter projects are using our solutions worldwide.
Ask your sales representative to know more.

POWER PRODUCTION & DISTRIBUTION

Renewable energy, nuclear energy,
heat production, substations automation

 PcVue is deeply committed to the efficient management of energy, one of the most critical challenges of our time

- ✓ Supervising the facilities of energy production: monitor and control, keep in operational conditions
- ✓ Maintain a sufficient level of production respecting the regulatory constraints
- ✓ Supervision and hypervision of the systems of energy production

- ✓ Deployment solutions from stand-alone station to high availability distributed systems
- ✓ KPI and generic dashboard reporting tools
- ✓ Dynamic busbar coloring
- ✓ Online/Offline simulation

THEY TRUST US

Hundreds of power projects are running and major power companies such as IBERDROLA, EDF Energies and more use our solutions worldwide.

Ask your sales representative to know more.

INDUSTRY

Solutions for Industry

Download brochure

A unique platform connected to any system, scalable and able to adapt to change seamlessly.

Ready for Industry 4.0 challenges

- ✓ Monitoring and controlling any kind of industrial installations for the production or the facilities
- ✓ Connecting heterogeneous devices and standardizing operation modes
- ✓ Securely ensuring the continuity of the production
- ✓ Optimizing the operations and maintenance of the production tools

- ✓ Ensuring the traceability of production data
- ✓ Reducing cost of system updates (development, operator training)
- ✓ Interoperability ensured with the global system of your company : ERP, CMMS, Quality, IT
- ✓ Built-in support of the 21CFR 11 standard

THEY TRUST US

Hundreds industry projects are running and major industrial companies use our solutions worldwide.

Ask your sales representative to know more.

INFRASTRUCTURES

Airports, ports, train stations, tunnels, bridges, highways, waterways

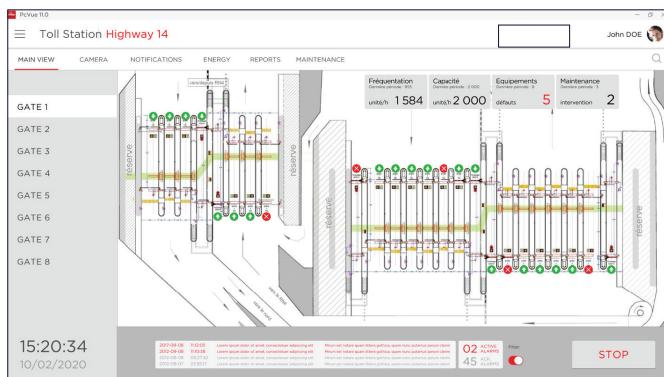

- ✓ Supervise various technical installations
- ✓ Ensure maintenance in operational conditions
- ✓ Contribute to the safety of people
- ✓ Open and scalable platform

PcVue gets all the mobility infrastructures under control

- ✓ Alarm and event management
- ✓ Integration of video and intercom systems
- ✓ Management of archiving and restitution of data

THEY TRUST US

Hundreds infrastructure projects are running and major companies use our solutions worldwide.
Ask your sales representative to know more.

TRANSPORTATION

Trains, metros, tramways, bus, electric vehicles

Download brochure

PcVue ensures a high availability monitoring system for any kind of transport

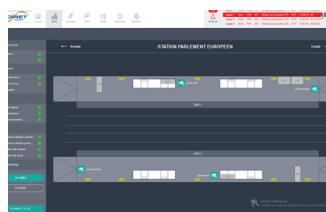

- ✓ Supervision of intra/extra urban transport facilities: monitoring and control, keep in operational conditions
- ✓ Ensure the safety of people
- ✓ Respect regulatory constraints
- ✓ Real-time supervision and alarm and event management

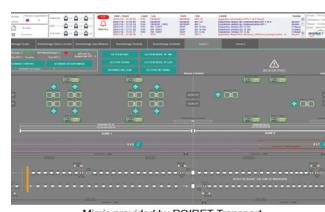

- ✓ Long-term operation with analysis tool and data processing (archiving, trends...)
- ✓ Report editions that meet the regulatory requirements

Mimic provided by ROIRET Transport

THEY TRUST US

Hundreds transportation projects are running worldwide.
Ask your sales representative to know more.

WATER AND WASTE

Water production & distribution,
water & waste treatment

Download brochure

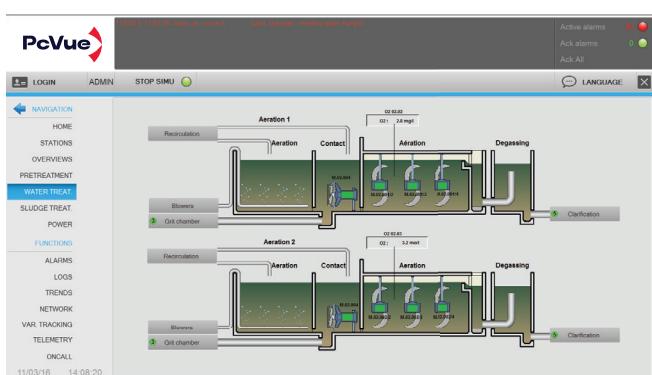

- ✓ Monitor and control all kind of water systems
- ✓ Enables return on investment by reducing engineering time, maintenance, and energy costs
- ✓ Improve operational effectiveness to increase both productivity and quality of service
- ✓ Meet the requirements for compliance and regulatory reporting
- ✓ Dedicated object libraries for Water

PcVue contributes to the Green City by optimizing processes while ensuring a high level of quality

- ✓ Events and alarms treatment
- ✓ Powerful trends capabilities
- ✓ On-call and mobile solutions
- ✓ Data processing and reporting tools
- ✓ High availability architectures
- ✓ Telemetry solutions

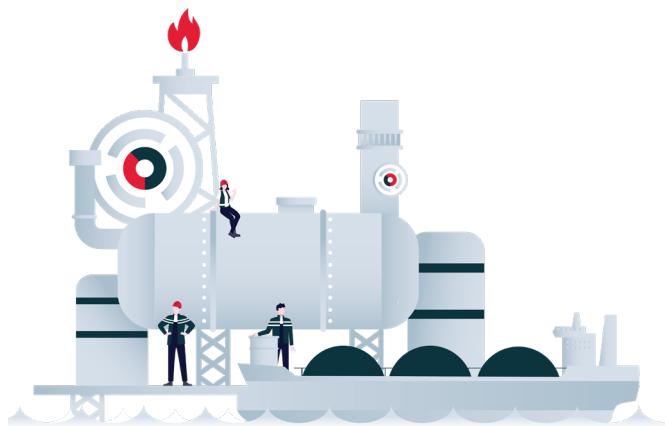

THEY TRUST US

Hundreds water and waste projects are running worldwide.
Ask your sales representative to know more.

OIL & GAS

Oil & gas sites monitoring and controlling platform,
Downstream, Midstream, Upstream

PcVue Platform to help you improve
your safety

NEEDS

- ✓ Built-in time-stamped protocol enabling data filtering and event tracking. Time stamping at source
- ✓ Redundant architectures for high availability systems, data acquisition and backup SIL2, SIL3 project references
- ✓ Archiving and reporting (via SQL Server) for diagnosis and metering application product transfer comparison
- ✓ Event management for real time and historical data
- ✓ 3D Mimics for easy “real life” equipment location
- ✓ Network behavior simulation
- ✓ Monitoring and running standby supplies
- ✓ Web HTML5 Access for remote monitoring of assets

THEY TRUST US

Hundreds of Oil & Gas projects are running worldwide.

Ask your sales representative to know more.

OPEN CONNECTIVITY SCADA SOFTWARE PLATFORM

In business for over 40 years, ARC Informatique is a forward-thinking industrial software editor with 16 offices worldwide. Using the latest technologies, ARC Informatique develops PcVue, a reliable, secure, and robust SCADA platform, dedicated to monitoring and control applications.

With 160+ dynamic team members, we are both physically very close and culturally compatible with our user base, thereby facilitating responsive customer care. Our ISO 9001, 14001 and 27001 certifications ensure quality, sustainability, and security in our development processes from design to delivery.

► A CUSTOMER-ORIENTED APPROACH

Listening to our customers and supporting them by developing and adapting our solutions through R&D and responsive technical support.
